## Who we are...

Armaghan Taravat Shams was established in 1971 with more than 10 official members in Iran. The total area of this company is 20000 sqm and processing plant of 7500 sqm. ATS is located in Mamaghan city, which is situated 40 Km out of Tabriz. Mamaghan is well known its quality Roasted chick pea supply. In addition, it is considered to be the largest city for producing chick peas. Our company is active in the field of import and export as a wholesale distribution of high quality of Nuts, Dried Fig, Date, Raisin, almond, walnut, pistachio and chick pea from Middle East counties, especially from Iran.

Hence, ATS produces more than 12 kind of dates and processes three kind of Raisins like Sultana, Golden and Natural sun dried Raisin and produces these product as we mentioned before in the different packing s. ATS's processes around 7,000 MT per year under Yaser, Alsamira and Golden Valley brands.

ATS's export scope is to European counties, Australia, south Asia, Middle East and North America. We are fully equipped with latest stainless steel machineries.

# Piarom Dates

Piarom dates are one of the most valuable dates in Iran from the commercial and economic point of view and have a very good market abroad. Many countries annually. These dates have high sugar. But the type of sugar is fructose. Which helps both metabolism and the body itself. Like dates, other dates should be thoroughly washed before use. One of the features of this date is its easy washing.

# *Rabbi Dates*

Rabbi date is one of most popular types of Iranian dates. Rabbi date belongs in the semi-dried date category with 15%-16% moisture. This long date has dark brown or dark brown-red color and has a thin skin. Iranian Rabbi date has a sweet taste and it is famous for its delicious and incredible taste. Dates have an exquisite amount of vitamins and minerals, in addition to antioxidants and fiber. Iran Rabbi dates are a considerable source of energy and nutrition.

# Mazafati Dates

Mazafati date is famous in the world for its excellent taste and high quality. This type of date has a high nutritional value and is considered as a great healthy snack. Mazafati dates are classified into two categories: humidity above 24% and low humidity with humidity below 24%. The moisture level depends on the harvesting time. In other word mazafati date is an other kind of products we produce.

# *Khasoei Dates*

Khasoei dates are a type of date that grows in the foothills. These dates are mainly found in cities located on the Zagros foothills, such as Jam City. Khasoei dates are one of the sweetest dates that does not bother the throat. And because of its small size, usually all three particular dates are about the same size as the other dates. Although it is recommended to consume about 5 dates per day, for khasoei dates this number can be increased to 15 per day. One of our products is khasoei dates.

# Zahedi Dates

Zahedi date is considered as semi-dry date varieties. It has light brown color. Because of its special color and taste and also easy warehousing condition, it's very popular among customers around the world. Zahedi Date has high nutritional value. This date is rich of various types of nutritious elements and contains minerals and Vitamins including Potassium, Magnesium, Protein, vitamin A, vitamin B, vitamin C. Our company is honored to produce this special date.

# *Golden Raisin*

Golden raisins are produced by harvesting green seedless grapes and mechanically drying them in the presence of sulfur dioxide for color retention. These golden raisins undergo various mechanical stem and foreign material removal processing, water-washing and rinsing, optical sorting and additional visual inspection.

# Sultana Raisin

Sultana is an other type of raisin. sultanas are very sweet and similar in flavor to honey. This product is highly demanding among our customers from all over the world and from different industries such as nuts-packing, bakery, confectionary and dried fruits wholesalers. Sultanas are light brown to dark in color gained from seedless grape variety. However, sultana raisins is one of the products we produce it.

## *Roasted Chick Pea*

Roasted Chick Peas ranks third among the food legume crops production in the world because Roasted Chick Peas are a rich source of vitamins and minerals, fiber, protein and is full of energy.

A serving size of roasted chick peas provides a lot of nutrients than most other nuts and snacks. Our company is well known in this industry for premium quality roasted chick peas.
